DETAILED ACTION

1. This action is in response to applicant's amendment received on 08/09/06.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Turner (4,748,744).

Turner discloses the invention (Fig. 1-9c) including:

- Claim 1; a nibbler tool having a housing 12, a die cutting head 27, a punch type blade 33 a control bore 40, a centrally disposed means (see Fig. 5), a blade holding block 41, positioning means 30 and a die cutting head inner end 28.
- Claim 2; the die cutting head inner end is cylindrical shaped and adapted to rotate (see Fig. 9A-B).
- Claim 3; an inwardly directed groove 29.
- Claim 4; a setscrew 30 (the tip of the screw extent slightly less than the outer surface of the groove) and a secondary housing bore 31.
- Claim 5; an intermediate surface with a hand grippable high friction surface (the surface of the die 27, see Fig. 9c).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Turner (4,748,744) in view of Batson (4,158,913).

Turner discloses the invention substantially as claimed except for a groove with a flat bottom surface and a screw with a flat bottom surface. However, Batson teaches the use of a groove with a flat bottom surface and a screw with a flat bottom surface for the purpose of locking the block relative to the head. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Turner's conical lock and groove by providing the groove with a flat bottom surface and the screw with a flat bottom surface as taught by Batson, since the examiner takes Official Notice of the equivalence of both locking devices for their use in the nibbling cutter tool art and the selection of any of these known equivalents to locks the block/die relative to the head/housing would be within the level of ordinary skill in the art.

Allowable Subject Matter

6. Claim 6 is allowed.

Response to Arguments

7. Applicant's arguments have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the rotational movement of the die with respect to the housing during the operational mode of the tool) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
